

Redonyl® Ultra Soft Chews

(Ultra-micronized Palmitoylethanolamide)

An ultra-small ingredient that offers ultra-big support for skin health.

When skin health is compromised, the exact cause can often be difficult to determine. Supporting the skin, regardless of the cause, is essential in keeping your canine patients and their owners happy and comfortable.

Redonyl Ultra Soft Chews provide a convenient, easy to administer, concentrated source of PEA to support skin health in dogs.

Feature/Function:

PEA affects mast cell degranulation and their release of reactive mediators

» Benefit:

PEA supports skin health associated with seasonal allergies.

Feature/Function:

Contains Ultra-micronized Palmitoylethanolamide (PEA-um)

» Benefit:

Ultra-micronized PEA has increased absorption.

Feature/Function:

Hypoallergenic formula

» Benefit:

Hypoallergenic soft chew contains no wheat, beef or chicken, which may benefit dogs that are allergic to these ingredients.

Dechra-US.com | 1-800-683-0660 | Support@dechra.com

In an 8-week study of 160 client-owned dogs, oral PEA-um was shown to be beneficial for skin health associated with seasonal allergies.¹

Concurrent use of Redonyl Ultra and topical therapies for the skin, including shampoos, mousse, conditioners, sprays and wipes, can help support the health of your canine patients' skin. For skin issues with wide ranging causes, a multi-modal approach is often recommended. Add Redonyl Ultra to your current dermatology protocol to see the benefits.

CHECK-OFF & ECHO NOTES

Start an Effective Team-to-Pet Owner Conversation

If engaging in an initial diagnosis, start with:

Ms. Jones, my exam revealed that Spot has seasonal allergies.

Or, for a follow up visit,

Ms. Jones, my exam revealed a need to modify Spot's treatment plan for seasonal allergies.

State the Solution

Redonyl Ultra Soft Chews provide a convenient, easy to administer, concentrated source of PEA to support skin health in dogs.

Make Your Recommendation

Ms. Jones, I believe Redonyl Ultra will be an important addition to managing Spot's skin health. It has a concentrated source of PEA and is easy to administer. Do you have any questions?
